Mathematics in schools offering the Integrated Programme is usually taught as an integrated subject, so that students will be able to better relate learnt knowledge to new knowledge and transfer conceptual understanding to application, as many mathematical concepts are interconnected. One driving force to write the series is to provide a guidebook especially for students in the Integrated Programme. The other is to share teaching ideas with other Mathematics teachers who love the subject as much as I do. Features: ♦ Each topic begins with a recap of key mathematical concepts to help students consolidate learning. ♦ Worked examples are included to enhance understanding and application of key concepts, with side notes explaining some of the working. ♦ Practice questions are tiered into three levels of difficulty. Level 1 aims to provide students with the necessary practice; Level 2 to further build the confidence and test students' understanding; Level 3 to challenge students with higher order thinking questions. ♦ ♦Math Wonderland♦ is one highlight of the book. Activities include extension of the topic, suggested alternative assessment and questions to stretch mathematical thinking. The primary purpose of the Wonderland is to allow students to think deeply about what they have learnt and to appreciate the learning of Mathematics beyond classroom. ♦ Step-by-step solutions to all questions are provided as an additional resource to students' problem solving process. I hope this book will benefit students studying Integrated Mathematics, as well as those

with aptitude for the subject who are preparing for the GCE O Level Mathematics and Additional Mathematics examinations. theory + MCQ of UGC NET Law Unit 1 Jurisprudence Gender inequality remains an issue of high relevance, and controversy, in society. Previous research shows that language contributes to gender inequality in various ways: Gender-related information is transmitted through formal and semantic features of language, such as the grammatical category of gender, through gender-related connotations of role names (e.g., manager, secretary), and through customs of denoting social groups with derogatory vs. neutral names. Both as a formal system and as a means of communication, language passively reflects culture-specific social conditions. In active use it can also be used to express and, potentially, perpetuate those conditions. The questions addressed in the contributions to this Frontiers Special Topic include:

- how languages shape the cognitive representations of gender
- how features of languages correspond with gender equality in different societies
- how language contributes to social behaviour towards the sexes
- how gender equality can be promoted through strategies for gender-fair language use

These questions are explored both developmentally (across the life span from childhood to old age) and in adults. The contributions present work conducted across a wide range of languages, including some studies that make cross-linguistic comparisons. Among the contributors are both cognitive and social psychologists and linguists, all with an excellent research standing. The studies employ a wide range of empirical methods: from surveys to electro-physiology. The papers in the Special Topic present a wide range of complimentary studies, which will make a substantial contribution to understanding in this important area.
