Looks at the life of a Navy petty officer during World War II, detailing his experiences in battle and on leave Shortlisted for the 2020 International Booker Prize Now in paperback, Fernanda Melchor's Hurricane Season is "a bilious, profane, blood-spattered tempest of rage" (The Wall Street Journal), that casts "a powerful spell" (NPR): "a narrative that not only decries an atrocity but embodies the beauty and vitality it perverts" (The New York Times) The Witch is dead. And the discovery of her corpse has the whole village investigating the murder. As the novel unfolds in a dazzling linguistic torrent, with each unreliable narrator lingering on new details, new acts of depravity or brutality, Melchor extracts some tiny shred of humanity from these characters—innies whom most people would write off as irredeemable—forming a lasting portrait of a damned Mexican village. Like Roberto Bolano's 2666 or Faulkner's novels, Hurricane Season takes place in a world saturated with mythology and violence—real

violence, the kind that seeps into the soil, poisoning everything around: it's a world that becomes more and more terrifying the deeper you explore it. What happened in American drama in the years between the Depression and the conclusion of World War II? How did war make its impact on the theatre? More important, how was drama used during the war years to shape American beliefs and actions? Albert Wertheim's *Staging the War* brings to light the important role played by the drama during what might arguably be called the most important decade in American history. As much of the country experienced the dislocation of military service and work in war industries, the dramatic arts registered the enormous changes to the boundaries of social classes, ethnicities, and gender roles. In research ranging over more than 150 plays, Wertheim discusses some of the well-known works of the period, including *The Time of Your Life*, *Our Town*, *Watch on the Rhine*, and *All My Sons*. But he also uncovers little-known and largely unpublished plays for the stage and radio, by such future luminaries as Arthur Miller and Frank Loesser, including those written at the behest of the U.S. government or as U.S.O. musicals. The American son of refugees who escaped the Third Reich in 1937, Wertheim gives life to this vital period in American history. The book is concerned with the deeds of white and Japanese Americans in a mutual struggle against racism, and argues that Asian American studies - indeed, race relations as a whole - will benefit from an understanding not only of racism but also of its opposition, antiracism. "In a widely researched and deeply considered book, Huerta argues that Vermeer's use of the camera obscura and other instrumental adjuncts parallels van Leeuwenhoek's pursuit of the "optical way," and embodies a profound philosophical connection between these investigators. Analyzing Vermeer's work, Huerta shows that the artist's choices were the result of his personal response to contemporary scientific discoveries, and the work of men such as van Leeuwenhoek, Christiaan Huygens, and Galileo Galilei. Furthermore, Huerta compares Vermeer's program of informed observation to the methods used by van Leeuwenhoek and other scientists to accumulate and analyze instrument-mediated knowledge. This approach enabled Vermeer to confront the same issues as natural philosophers regarding the interpretation of unfamiliar images presented by instrumental systems."--BOOK JACKET. The first global survey of art in WWII, this volume presents artists whose work both supported and criticized their nations' war

efforts. The log of this explorer's journey in plain-spoken English. For almost 30 years as label boss, producer, and talent conductor at XL Recordings, Richard Russell has discovered, shaped and nurtured the artists who have rewritten the musical dictionary of the 21st century, artists like The Prodigy, The White Stripes, Adele, M.I.A, Dizzee Rascal and Giggs. **LIBERATION THROUGH HEARING** tells the remarkable story of XL Recordings' three decades on the frontline of innovation in music, and Russell's own story; his highs and lows steering the fortunes of an independent label in a rapidly changing industry. This is the portrait of a man who believes in the spiritual power of music to change reality, and of a label that refused to be categorised by genre. 'Taking us from the rap 80s to the rave 90s into the grimy 21st century, Richard Russell is a Firestarter in his own right and his story is a riveting adventure' Simon Reynolds 'Russell reveals his forensic love of music and its strategies. A fascinating read' Damon Albarn 'Required reading for anyone who cares about the recent history of British music' Gilles Peterson This clear and elegant translation reveals how a modern Japanese thinker dared to show the basic flaw of Western epistemology. In unmasking this limitation, Matsuo presents an Eastern view of a unified experience, and provides an epistemological basis for comparative philosophy. Matsuo notes that while early Greek thought began by focusing on the right counsel ("Know thyself"), since then Western thought has been influenced by empiricistic analysis fired by the rise of scientific philosophy. The author thus turns to Eastern epistemology, in particular Buddhist thought, for clues to the unified experience. The seminal idea of emptiness (*śūnyatā*) plays a distinct role in this discovery. The concept of emptiness encompasses the whole dimension of perception where there is no room for separation into mind and body and/or any other form of dichotomy. Once it is known that the total dimension of perception—the logic of unity—functions in each and every person, then and only then can the field of comparative thought and philosophy be cleared of all preconceptions and move into a more fruitful exchange of ideas. Until such a time, Matsuo claims, we are hopelessly engaged in merely refining the epistemological process without ever being able to understand the very basis of intelligence. A portrait of the late star of Discovery Channel's *Deadliest Catch* reveals his high-risk private life of tempestuous affairs, drug-fueled parties and motorcycle riding as well as his virtues as a devoted friend, loving father and

steadfast captain. 50,000 first printing. The Jazz Itineraries series, a new format based on Ken Vail's successful Jazz Diaries, charts the careers of famous jazz musicians, listing club and concert appearances with details of recording sessions and movie appearances. Copiously illustrated with contemporary photographs, newspaper extracts, record and performance reviews, ads and posters, the series provides a fascinating insight into the lives of the greatest jazz musicians of our times. No.2 in the series, co-authored by Ron Fritts, Ella Fitzgerald: The Chick Webb Years & Beyond 1935-1948, chronicles Ella's life from her discovery and development by Chick Webb, the shock of Webb's early death, her years as a bandleader, her success as a solo singer, marriage to Ray Brown and her first tour of England. Scientific research is viewed as a deliberate activity and the logic of discovery consists of strategies and arguments whereby the best objectives (questions) and optimal means for achieving these objectives (heuristics) are chosen. This book includes a discussion and some proposals regarding the way the logic of questions can be applied to understanding scientific research and draws upon work in artificial intelligence in a discussion of heuristics and methods for appraising heuristics (metaheuristics). It also includes a discussion of a third source for scientific objectives and heuristics; episodes and exemplars from the history of science and the history of philosophy. This book is written to be accessible to advanced students in philosophy and to the scientific community. It is of interest to philosophers of science, philosophers of biology, historians of physics, and historians of biology. Looks at the Smithsonian Institution, a collection of national museums--the legacy of an Englishman who never set foot on American soil--from its inception to the present day. Its purpose is to both increase and diffuse knowledge. Surveys the bureaucratic mistakes--including poor weapons and strategic blunders--that marked America's entry into World War II, showing how these errors were overcome by the citizens waging the war. Although there is constant conflict over its meanings and limits, political freedom itself is considered a fundamental and universal value throughout the modern world. For most of human history, however, this was not the case. In this book, Kurt Raaflaub asks the essential question: when, why, and under what circumstances did the concept of freedom originate? To find out, Raaflaub analyses ancient Greek texts from Homer to Thucydides in their social and political contexts. Archaic Greece, he concludes,

had little use for the idea of political freedom; the concept arose instead during the great confrontation between Greeks and Persians in the early fifth century BCE. Raaflaub then examines the relationship of freedom with other concepts, such as equality, citizenship, and law, and pursues subsequent uses of the idea—often, paradoxically, as a tool of domination, propaganda, and ideology. Raaflaub's book thus illuminates both the history of ancient Greek society and the evolution of one of humankind's most important values, and will be of great interest to anyone who wants to understand the conceptual fabric that still shapes our world views. "Crossing the Pond also chronicles the unsuccessful efforts of Nazi propagandists to exploit Native Americans for the Third Reich, as well as the successful efforts of the United States government and the media to recruit Native Americans, utilize their resources, and publicize their activities for the war effort. Attention is also given to the postwar experiences of Native American men and women as they sought the franchise, educational equality, economic stability, the right to purchase alcohol, and the same amount of respect given to other American war veterans."--BOOK JACKET. Request a free 30-day online trial to this title at www.sagepub.com/freetrial! Spanning two volumes of approximately 450 entries in an A-to-Z format, this encyclopedia explores the controversial drug war through the lens of varied disciplines. A full spectrum of articles explains topics from Colombian cartels and Mexican kingpins to television reportage; from "just say no" advertising to heroin production; and from narco-terrorism to more than \$500 billion in U.S. government expenditures. Key Themes- Cases- Conferences and Conventions- Countries (Affecting U.S. Drug Policy)- Drug Trade and Trafficking- Laws and Policies- Organizations and Agencies- People- Presidential Administrations- Treatment and Addiction- Types of Drugs

Everything you were taught about evolution is wrong. By the middle of the 19th century, as scientists explored the frontiers of polar regions and the atmosphere, the ocean remained silent and inaccessible. Rozwadowski explores the scientific and cultural history of how this changed. *Dotyczy m. in. Polski.* Detailed engine data & work instructions for both petrol & diesel fuel systems. Covering 4.0 V8 petrol engines and Td5 diesel engines. A detailed guide to maintenance & repair covering of all parts of the car and engine including torque wrench settings, emission control, engine management, fuel delivery, cooling, manifolds, exhaust, clutch, automatic & manual gear box, propeller, axles, steering, suspension,

*brakes, restraints, doors, exterior fittings, interior trim components, screens, seats, sunroof, panel repairs, heating, ventilation, air conditioning, wipers and washers, instruments and so much more. The year is 1942, and while America is reeling from the first blows of WWII, Osgood is just a nine-year-old boy living in Baltimore. As the war rages somewhere far beyond the boundaries of his hometown, he spends his days delivering newspapers, riding the trolley to the local amusement park, going to Orioles' baseball games, and goofing around with his younger sister. With a sharp eye for details, Osgood captures the texture of life in a very different era, a time before the polio vaccine and the atomic bomb. In his neighborhood of Liberty Heights, gaslights still glowed on every corner, milkmen delivered bottles of milk, and a loaf of bread cost nine cents. Osgood reminisces about his first fistfight with a kid from the neighborhood, his childhood crush on a girl named Sue, and his relationship with his father, a traveling salesman. He also talks about his early love for radio and how he used to huddle under the covers after his parents had turned off the lights, listening to Superman, The Lone Ranger, The Shadow, and, of course, to baseball games. **Defending Baltimore Against Enemy Attack** is a gloriously funny and nostalgic slice of American life and a moving look at World War II from the perspective of a child far away from the fighting, but very conscious of the reverberations. **LONGLISTED FOR THE 2020 MAN BOOKER INTERNATIONAL PRIZE A NEW YORK TIMES NOTABLE BOOK OF THE YEAR** "Her most unsettling work yet — and her most realistic." --New York Times Named a Best Book of the Year by The New York Times, O, The Oprah Magazine, NPR, Vulture, Bustle, Refinery29, and Thrillist A visionary novel about our interconnected present, about the collision of horror and humanity, from a master of the spine-tingling tale. They've infiltrated homes in Hong Kong, shops in Vancouver, the streets of in Sierra Leone, town squares in Oaxaca, schools in Tel Aviv, bedrooms in Indiana. They're everywhere. They're here. They're us. They're not pets, or ghosts, or robots. They're real people, but how can a person living in Berlin walk freely through the living room of someone in Sydney? How can someone in Bangkok have breakfast with your children in Buenos Aires, without your knowing? Especially when these people are completely anonymous, unknown, unfindable. The characters in Samanta Schweblin's brilliant new novel, *Little Eyes*, reveal the beauty of connection between far-flung souls—but yet they also*

expose the ugly side of our increasingly linked world. Trusting strangers can lead to unexpected love, playful encounters, and marvelous adventure, but what happens when it can also pave the way for unimaginable terror? This is a story that is already happening; it's familiar and unsettling because it's our present and we're living it, we just don't know it yet. In this prophecy of a story, Schweblin creates a dark and complex world that's somehow so sensible, so recognizable, that once it's entered, no one can ever leave. The story of an uncovered voyage as colorful and momentous as any on record for the Age of Discovery--and of the Black mariner whose stunning accomplishment has been until now lost to history. It began with a secret mission, no expenses spared. Spain, plotting to break Portugal's monopoly trade with the fabled Orient, set sail from a hidden Mexican port to cross the Pacific--and then, critically, to attempt the never-before-accomplished return, the vuelta. Four ships set out from Navidad, each one carrying a dream team of navigators. The smallest ship, guided by seaman Lope Martín, a mulatto who had risen through the ranks to become one of the most qualified pilots of the era, soon pulled far ahead and became mysteriously lost from the fleet. It was the beginning of a voyage of epic scope, featuring mutiny, murderous encounters with Pacific islanders, astonishing physical hardships--and at last a triumphant return to the New World. But the pilot of the fleet's flagship, the Augustine friar mariner Andrés de Urdaneta, later caught up with Martín to achieve the vuelta as well. It was he who now basked in glory, while Lope Martín was secretly sentenced to be hanged by the Spanish crown as repayment for his services. Acclaimed historian Andrés Reséndez, through brilliant scholarship and riveting storytelling--including an astonishing outcome for the resilient Lope Martín--sets the record straight. A New York Times Notable Book of 2020 Named one of the best books of 2020 by The New Yorker; BBC; NPR; Time ("100 Must-read Books"); Kirkus; and The Washington Post ("50 Notable Works of Fiction") In the highly anticipated follow-up to his beloved debut, What Belongs to You, Garth Greenwell deepens his exploration of foreignness, obligation, and desire. Sofia, Bulgaria, a landlocked city in southern Europe, stirs with hope and impending upheaval. Soviet buildings crumble, wind scatters sand from the far south, and political protesters flood the streets with song. In this atmosphere of disquiet, an American teacher navigates a life transformed by the discovery and loss of love. As he prepares to leave the place

he's come to call home, he grapples with the intimate encounters that have marked his years abroad, each bearing uncanny reminders of his past. A queer student's confession recalls his own first love, a stranger's seduction devolves into paternal sadism, and a romance with another foreigner opens, and heals, old wounds. Each echo reveals startling insights about what it means to seek connection: with those we love, with the places we inhabit, and with our own fugitive selves. Cleanness revisits and expands the world of Garth Greenwell's beloved debut, *What Belongs to You*, declared "an instant classic" by *The New York Times Book Review*. In exacting, elegant prose, he transcribes the strange dialects of desire, cementing his stature as one of our most vital living writers.

What did Africans think of the first Europeans they saw? Why did some Africans seek political and religious alliances with Europeans? How successful were African traders in acquiring what they wanted from Europeans in the new Atlantic trade? *Africa's Discovery of Europe: 1450-1850* provides surprising answers to these and many other questions. This groundbreaking book on African-European interactions is the first to look broadly at the subject from an African perspective rather than from a European one. David Northrup explores the African side of this cultural collision as it unfolded in Africa, Europe, and the Atlantic world between 1450 and 1850. Featuring extensive use of life stories and quotations from Africans, the text is organized thematically with chapters devoted to first impressions, religion and politics, commerce and culture, imported goods and technology, the Middle Passage, and Africans in Europe. Northrup examines Africans' intellectual, commercial, cultural, and sexual relations with Europeans and describes how the patterns of behavior that emerged from these encounters shaped pre-colonial Africa. The book concludes with an examination of the roles of race, class, and culture in early modern times, and suggests which themes in Africa's continuing discovery of Europe after 1850 were similar to earlier patterns, and why some themes were different. The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and Nevada's Burning Man festival. Contributors examine

raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. *Rave Culture and Religion* will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies. This two-volume set LNAI 7523 and LNAI 7524 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases: ECML PKDD 2012, held in Bristol, UK, in September 2012. The 105 revised research papers presented together with 5 invited talks were carefully reviewed and selected from 443 submissions. The final sections of the proceedings are devoted to Demo and Nectar papers. The Demo track includes 10 papers (from 19 submissions) and the Nectar track includes 4 papers (from 14 submissions). The papers grouped in topical sections on association rules and frequent patterns; Bayesian learning and graphical models; classification; dimensionality reduction, feature selection and extraction; distance-based methods and kernels; ensemble methods; graph and tree mining; large-scale, distributed and parallel mining and learning; multi-relational mining and learning; multi-task learning; natural language processing; online learning and data streams; privacy and security; rankings and recommendations; reinforcement learning and planning; rule mining and subgroup discovery; semi-supervised and transductive learning; sensor data; sequence and string mining; social network mining; spatial and geographical data mining; statistical methods and evaluation; time series and temporal data mining; and transfer learning. Drug Discovery and Evaluation has become a more and more difficult, expensive and time-consuming process. The effect of a new compound has to be detected by *in vitro* and *in vivo* methods of pharmacology. The activity spectrum and the potency compared to existing drugs have to be determined. As these processes can be divided up stepwise we have designed a book series "Drug Discovery and Evaluation" in the form of a recommendation document. The methods to detect drug targets are described in the first volume of this series "Pharmacological Assays" comprising classical methods as well as new technologies. Before going to man, the most suitable compound has to be selected by pharmacokinetic studies and experiments in toxicology. These preclinical methods are described in the second volume „Safety and Pharmacokinetic Assays". Only then are first studies in human beings

allowed. Special rules are established for Phase I studies. Clinical pharmacokinetics are performed in parallel with human studies on tolerability and therapeutic effects. Special studies according to various populations and different therapeutic indications are necessary. These items are covered in the third volume: „Methods in Clinical Pharmacology".

Daft Punk's *Discovery* is a homage to a fascinating, troubled beast of an album that casts a huge shadow over the 21st Century. It's a global view of *Discovery* as a cultural phenomenon, placing the album at the centre of celebrity culture, fan clubs, video, the music business etc., while also examining its profound musical impact. You can draw lines from *Discovery* to *Glass Swords*, Kanye West, EDM, Autotune, iTunes, Beyoncé, *Guilty Pleasures*, social media and more. *Discovery*'s footprints can be found all over the modern world but it also looked back to Daft Punk's childhood, to Van Halen records, Japanese cartoons and even Johann Sebastian Bach. *Discovery* was a record that confounded many fans when it was released in 2001, thanks to its blatant pop hooks and unlikely sonic bricolage. It was a record that was - and still is - widely misunderstood; *Discovery*'s impact has only become clear with the passing of time, as Daft Punk have been proved right time and time again.

A first-hand account of the horrors World War II inflicted upon children around the world, based on journals, diaries, and letters. This new interpretation of the reign of Calixtus II (1119-1124) challenges the conventional analysis explaining why this life-long opponent of the emperor, Henry V, agreed to compromise over imperial investitures of bishops in the Concordat of Worms of 1122.

Choice Outstanding Academic Title 2003

During the nineteenth century, American schools for deaf education regarded sign language as the "natural language" of Deaf people, using it as the principal mode of instruction and communication. These schools inadvertently became the seedbeds of an emerging Deaf community and culture. But beginning in the 1880s, an oralist movement developed that sought to suppress sign language, removing Deaf teachers and requiring deaf people to learn speech and lip reading. Historians have all assumed that in the early decades of the twentieth century oralism triumphed overwhelmingly. Susan Burch shows us that everyone has it wrong; not only did Deaf students continue to use sign language in schools, hearing teachers relied on it as well. In *Signs of Resistance*, Susan Burch persuasively reinterprets early twentieth century Deaf history: using community sources such as Deaf

newspapers, memoirs, films, and oral (sign language) interviews, Burch shows how the Deaf community mobilized to defend sign language and Deaf teachers, in the process facilitating the formation of collective Deaf consciousness, identity and political organization.
