"Manufactured at Green Bay, Wisconsin" is an account of Northwest Engineering Company from its early days as a builder of tugboats for the World War 1 effort to the role the company played as one of the premier manufacturers of excavators in the world. The team of Folsom and Torres trace Northwest's rise and eventual demise in vivid clarity giving an account of the company's key personnel and products. Contained within, on over 300 pages, is informative text and over 400 b/w and color images plus drawings from the authors', past employees', and other contributors' personal collections. Enthusiasts of heavy equipment and the heavy construction machinery industry, and devotees of local interest, will find new insight into this past enterprise of Titledown, USA. Vols. 1-17 include Proceedings of the 10th-24th (1914-28) annual meeting of the society. A nationally recognized author looks at both the similarities and differences in the engine company operations practiced by fire departments throughout the United States. He discusses the equipment, staffing, and operations of engine company firefighters at structural fires and emergencies. The construction process, right through from planning and design to use and demolition, has a major impact on society. Traditionally, concern has been focused on its environmental impact and the quest for sustainability, but this has now extended into the wider remit of Corporate Social Responsibility (CSR). Essentially, this means that businesses must act (voluntarily) in a socially ethical manner by developing a policy that encompasses the core principles enshrined by CSR. A unique presentation on a topic of emerging importance, Corporate Social Responsibility in the Construction Industry is essential reading for all built environment undergraduate and post-graduate courses, as well as CEOs and senior managers within construction businesses who may be about to embark on developing a CSR strategy. A successful leader shares his own story, from child of the Depression to CEO. From growing up on the banks of the Ohio River during the Great Depression to acquiring executive management roles at large international companies, James Hardyman's life has been full of twists, turns, hard work, and achievement. During his career, Hardyman

helped build corporations as a CEO, learned the ropes of Wall Street, and interacted with US presidents and congressional leaders. As a result, he acquired a keen, first-hand understanding of corporate America, which propelled his reputation as a well-respected leader. *Engineering Corporate Success* traces Hardymon's personal story and career trajectory—including his childhood, college years at the University of Kentucky, service in the US Army, and employment in some of the highest-level executive positions in America. Based on a series of interviews conducted by Terry L. Birdwhistell for the Louie B. Nunn Center for Oral History, the book reveals Hardymon's maxims for success, experiences of rising through the corporate ranks, and key insights into how business decisions are made in an increasingly international environment. Hardymon also discusses the importance of philanthropy, his philosophy of giving back, and his close relationship with the University of Kentucky. This well-rounded work provides a forthright description of the rewards and challenges that come with balancing a prosperous personal and professional life. Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business. Through words and pictures from Breer's own photography collection, *The Birth of Chrysler Corporation and Its Engineering Legacy* offers a nostalgic look at the industry's early days and provides us with insight into the men that were instrumental to Chrysler Corporation's engineering success. After reading this account of the stellar careers of Zeder, Skelton, and Breer, and the many engineering accomplishments for which they were responsible, automotive engineers will appreciate the great legacy given to them by these men. A book of interest to all automotive historians, design engineers, car enthusiasts, and anyone wishing to learn more about the automobile industry in its early years. Chapters cover: Carl Breer: The Early Years With Zeder and Skelton at Studebaker, 1916-1918 We Create Chrysler Corporation Reminiscences of Early Product Developments at Chrysler Corporation Birth of the Airflow Car Railroad Ride Research Along Airflow Principles The Chrysler Engineering Team and the War Effort Death of Walter Chrysler

and a New Regime. Reviews Students from all engineering disciplines, as well as professional engineers, need to understand company finance in order to work effectively within commercial organisations. Corporate finance is therefore an essential aspect of the education of every engineer. Written by an engineer, this innovative book provides a course in company finance, illustrated with numerous case studies of well-known engineering companies - including Rolls Royce, ICI, British Aerospace, Ferranti, Ford, Glaxo, GEC, British Steel, PowerGen and others. General principles are related to the affairs of specific companies, thus giving an effective overview for the busy engineer. Author John Mittendorf has completely rewritten his best-selling book, Truck Company Operations, a must-have for all firefighters who are assigned to the truck and who have responsibilities for the truck on the fireground. The new second edition covers the many aspects, tasks, and functions of a truck company, and contains new and expanded information related to search, reading a building, reading smoke, the Ten Commandments of truck company operations, operating truck apparatus, and more--all from a truck company perspective. His commentary also provides interesting insights into the early careers of future Civil War generals - Lee, Beauregard, Pemberton, and McClellan. The narrative is a striking testament to the impact of West Point-trained officers on the course of the war and to the effectiveness of Winfield Scott's army."--

**BOOK JACKET.** A guide to running a construction company that provides tips and information on creating operating procedures, improving worker skills, using computers, keeping the right forms and paperwork up to date, competitive bidding, and other topics. Starting your own architecture or engineering firm may seem a bit daunting. In *Operating Your Own Architectural or Engineering Practice*, author Walter J. Smith presents a handbook to help you navigate that process in order to be successful in the long term. Based on information gleaned from creating and running his own firm, Smith details what it takes to plan, organize, staff, direct, and control a business. Filled with valuable tips and advice, this guide also contains a host of sample forms and documents integral to establishing and maintaining a thriving practice. Praise for *Operating Your Own Architectural or Engineering Practice* "An invaluable resource for a young professional wanting to start his/her

own practice. From his years of experience in the profession, Mr. Smith provides insight on planning, financing, and managing relationships with staff and consultants—topics untouched in today's typical academic environment. Knowing on 'day one' what is really involved in the intricacies and mechanics of running a business will increase your potential for success." -Kelly Wieczorek, intern, Bay Design Associates Architects, PL "What started out as a 'pocket guide' for architects and engineers actually turned into a handbook for all disciplines in the building process. Contractors, owners, consultants, and financial professionals will receive great insights from reading this book." -Myron Mickelson, president of Mickelson Construction Services Inc.

Can you be too cute for your own good? Sadly, the answer is yes. In a world where kittens and humans coexist, several talented kittens with skills in architecture, construction, engineering, and plumbing have discovered that nobody will take them seriously in the workplace because they are just too darned adorable. So the kittens take matters into their own hands, and form their own all-feline firm: the Kitten Construction Company! They're going to build the best mayor's mansion the city has ever seen . . . just as soon as they can stop chasing laser pointers. With adorable art and a hilarious, pun-filled story, Kitten Construction Company is the latest kid-friendly comic from Hippopotamister author-illustrator John Patrick Green.

Herb Johnson believes that we are meant to live abundantly. We are designed to live the good life, with the freedom and creativity to follow our passions. What will defeat us is an attitude of impoverishment—the belief that we are undeserving, so why should we try. In *Engineering Business Success*, Johnson explores the structure of success. Many books overflow with detail about business systems—important, yes, but they don't reveal the big picture of what it takes to succeed. What fundamentally must be in place to open and effectively operate a successful business? As an engineer and as a businessperson, Johnson has written an important resource for both. But his book is for anyone who wants to make something of himself or herself, because the themes here are central to winning. Business opportunities abound in our society, and Johnson shows you what you should be looking for, and what needs to be in place if you are to win. So many businesses fail right out of the gate, and Johnson has the antidote

so that it won't happen to you. Foremost, he says, you need to seize the responsibility to serve—to serve your industry, your clients, and your stakeholders. That is the underpinning of success. In *Engineering Business Success*, Herb Johnson shares what he has learned in his 28 years at the helm of the thriving company that he founded. And he shares what he has learned in life, since his boyhood rural upbringing, through his years as a young engineer, and as he has worked to make the most of his business. Johnson's story demonstrates the trajectory of following one's passion—and doing so with the spirit of service and with the business savvy that he has learned along the way. “Herb embraces an attitude of abundance, a dedication to discipline, and commitment for lifetime learning, all of which pour forth from this story of his entrepreneurial journey. Business owners, and those wishing to experience the freedoms Herb has enjoyed, will get a dose of enthusiasm and pick up some helpful hints from reading this book.” —VERNE HARNISH, FOUNDER, ENTREPRENEURS' ORGANIZATION AND GAZELLES AUTHOR OF SCALING UP AND MASTERING THE ROCKEFELLER HABITS

Presenting a systematic approach to concurrent engineering (CE), this reference accommodates the small corporation's quest to incorporate better design management practices. The author provides an easy-to-follow methodology that eliminates the need for costly consultants and promotes environmentally friendly solutions and introduces three main design models to aid in new, evolutionary, and incremental product design. She examines how the adoption of CE practices improves overall performance. Topics include: engineering specifications for product parameters, conceptual and embodiment design, vendor selection and approval, prototyping, line and equipment installation, and more. 61

As firefighters, even how we answer the phone or the door makes a first and lasting impression on the public and the community we serve. Author Jason Hoelmann fills in the gaps that may exist in fire service teaching to better prepare you for a lifetime of the greatest job on earth. *The New Company Officer* tackles the not-so-obvious challenges you will face during your fire service career. Discover: Why do firefighters make bad decisions on the job and off duty? How can firefighters deal with their own problems and their challenges as firefighters? How can you enrich our own career and help

your fellow firefighters improve, grow, and advance their own career? The New Company Officer strives to make a big impact on your department and your success. “We do an excellent job pulling hose and throwing ladders,” Hoevelmann writes, “but how do we deal with people every day?” Some of the goals book will help you to achieve are to: be prepared, set expectations, follow through, serve, listen, be humble, be a leader, make no excuses, do your best, and do what others won’t do. What you will learn: How to handle difficult colleagues How to create company drills that keep your firefighters proficient How to delegate and lead by example
